Working Together Like A Visual Symphony

You coordinate your clothes and jewelry, you coordinate your walls and furniture, you even coordinate your bath towels. So why not coordinate your storm door and your entry door? The Coordinated Entryway System from Paragon features matching and coordinating color palettes for your storm door and your entry door that work in perfect harmony. And, with keyed-alike locks for storm and entry doors, you'll always have the right key for the right door.

Storm Door Collections

The Paragon Storm Door Advantage Features...

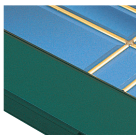
WindResist™ overlapping frame system eliminates reveals on the face of the door to block direct winds and features triple-seal weatherstripping to minimize air infiltration.

3-1/2" wide by 1-1/2" thick reinforced aluminum frame is foam-filled to insulate and provide quiet, solid operation.

Color-matched screw cap covers conceal installation hardware to provide the finishing touch with a clean, neat look.

Aluminum laminated foam panels on Harmony Collection offer excellent weather-resistance and add additional stability to the storm door.

QuikCam™ glass retention cam locks hold glass securely in place while allowing a quick and easy transition from glass to screen.



Baked on high gloss Duracron paint finish available in five coordinating Paragon colors to match or complement the Paragon entry door color palette.

Corsica mortised hardware features rounded overlap strike plate for smooth operation and to prevent damage to storm door frame caused by hardware contact.

Heavy-duty dual color matched closers for Allure Collection and single color matched closer for Harmony Collection will keep your storm door operating smoothly for years.

Four heavy-duty hinges assure quiet, smooth operation.

Formed steel corner gussets prevent sagging and keep storm door square in opening.

Key Benefits: Beauty · Energy Efficiency · Security · Durability

Screens

Standard charcoal fiberglass screens are attractive and functional. High-strength pet-resistant screens resist damage by pets. Heavy-duty fiberglass Solar Guard privacy screens are specially-designed to reduce transparency and block out heat and glare.

Tinted Glass

Available for Allure model SD-251 and Harmony model SD-221 only, tinted glass adds a touch of style to your entryway. Bronze or gray tint filters harmful UV rays and blocks out heat and glare while providing privacy.
